@empowerfarmers

MINNA 2026

WHY YOU SHOULD BACK A RURAL FARMER IN NIGERIA.

They have the land. They have the will. We bring the rest. They grow 2-3x more -- then give back, not because they have to, but because they choose to.

100+ Farmers / 2026 Season	**2-3x** Yield Increase
$0 Interest Charged	**7-8 mos** Repayment Window
100% Harvest Gift Return	**9** Avg. Household Size

She is ready.

One farmer. One season. One family that eats.

What it costs, how to contribute

06 **WHAT YOU GAIN**
Eight reasons to be part of this harvest

SECTION 01

THE CHALLENGE

Why smallholder farmers in Nigeria are stuck

Good farmers. Empty bowls.

This does not have to be the story.

Nigeria has millions of skilled smallholder farmers. What they lack is not ability -- it is access. Access to quality seeds. Access to the right fertilizer. Access to cash at the moment planting demands it. Without that access, the season is lost before it begins.

PLANTING WINDOW

Only 6 weeks per season.
Miss it and the year is gone.

INPUT COSTS

Seeds + fertilizer cost over
170,000 Naira upfront.

YIELD GAP

Average yield is 2-3x below
what the same land could grow.

FOOD INSECURITY

Most households run out
of their own harvest in 4 months.

SECTION 02

WHO WE ARE.

empowerFarmers -- an initiative of the ELP Foundation

@empowerfarmers

An initiative of Empowerment for Local People Foundation
empowerlocals.org

empowerFarmers delivers interest-free agricultural inputs, agronomic training, and evidence-based field support to smallholder farmers in Niger State. We go to the communities -- on the land, with the farmers, every planting season.

Registered NGO: Federal Republic of Nigeria

Focus Area: Smallholder Agriculture

Location: Abuja (HQ) | Minna (Field)

2024 Reach: 11 farmers, 2 communities

2026 Target: 100 farmers, one season

Website: empowerlocals.org

Every farmer gets a full kit.

Before the rains come. Not after.

01

CERTIFIED SEEDS

SC651 hybrid maize seeds

Higher yield, faster maturity, optimised for Minna soil

02

NPK FERTILIZER

Two 25 kg bags per acre

NPK 20-10-10 -- correct basal application rate

03

NEEM COATED UREA

One 50 kg bag

Slow-release urea for top-dressing -- more nitrogen reaches the crop

04

LAGOON HERBICIDE

Full season weed control

Clears the field in the critical first 10 weeks of growth

05

LABOUR CASH GRANT

Cash for land preparation

Farmers clear and plant on time without waiting for credit

06

AGRONOMIC TRAINING

Monthly in-person field visits

Hands-on guidance from planting through to harvest storage

SECTION 03

WHAT MAKES US DIFFERENT.

Six commitments that set us apart.

No favourites.

No middlemen.

01 OPEN COLLECTION

Every household documented in public. Community leaders present. Nothing behind closed doors.

02 SELECTION BY NEED

Two criteria only: does their need match our offering, and do we have capacity. Name and status count for nothing.

03 TRANSPARENT OUTCOME

The selected list and criteria are shown to the community leader. Everyone sees who was chosen and why.

Need determines who we serve. Nothing else.

We Listen.

Every planting season is different.

01 We survey every community before every season. No assumptions.

02 This year: land access and security emerged as new needs. We adjusted.

03 We track wealth, food security and school attendance -- not just income.

04 What we hear shapes what we bring. Every season is built from scratch.

We don't build the programme first. We ask first, then we build.

The Harvest Gift.

A voluntary contribution that builds accountability.

01 At harvest, farmers choose to give 1-4% of what they grew.

02 It is a gift -- not a loan repayment. Completely voluntary.

03 In 2024, every single farmer gave back. Without being asked twice.

04 Each gift funds the next family. The programme sustains itself.

100% of farmers in 2024 gave back voluntarily. No one was asked twice.

We blend into their world.

Then we get to work.

We Stay.

Showing up builds trust. Trust changes outcomes.

Every farm. Every month.

Our field team visits every plot for the entire growing season -- not just at planting and harvest.

24-hour response.

If something goes wrong on the farm, we are there within a day. Farmers know they are not alone.

100% season completion.

Every farmer who started with us in 2024 finished the season. That is what consistent presence does.

Trust is not built in a delivery. It is built month by month, in person.

We Track What Matters.

Wealth and food security, not just income.

01 We track wealth and food security -- not just income.

02 We record the role of women in farm decisions each season.

03 Household food stores, school attendance, asset ownership all measured.

04 Every finding -- good or bad -- is shared with donors and the community.

We measure what poverty actually looks like -- and whether it is changing.

Minna.

Niger State, North-Central Nigeria.

~40%

of Niger State households depend on farming

60-70%

yield gap on land that could produce far more

80%+

of farmers cannot afford quality inputs upfront

2

communities surveyed and ready to begin in 2026

Why Minna?

Strong community leadership
Community heads and leaders actively engaged.

Existing farming knowledge
Farmers know their land. They just need the inputs.

We have been there.
Field visits done. Baseline collected. Farmers ready.

170 km from Abuja.
Close enough to monitor closely every month.

SECTION 04

OUR IMPACT

Results, where we work, and 2026 plans

@empowerfarmers

Here is what happened when we gave farmers what they needed:

2-3x

Average yield increase across all 11 farmers.

11 / 11

Farmers gave the harvest gift voluntarily.

9 of 11

Reported their biggest harvest in memory

3 to 5 months

Extra food security beyond prior season

98%

Loan repayment rate. Repayment window closes in December.

Low

Crop failures. Significantly below the local average.

100%

Harvest gift return rate -- every farmer gave back.

FROM THE FIELD

"We had never seen cobs this size."

-- Farmer, Minna community, after 2024 harvest

Before joining empowerFarmers, this farmer had never used certified hybrid seeds. He planted local saved seed on the same plot every season and accepted the same thin harvest. In 2024 he received SC651 seeds, NPK fertilizer, and a full training programme. By December he had harvested three times what he had ever grown on that land.

Minna, 2024

17 - 20 APRIL 2026

We just were there.

We visited Garatu and Taidna. Met with community leaders and several farmers. They told us what they need: quality inputs, cash for labour, tractors, and access to nearby farmland. They are waiting. Baseline data collected. Analysis ongoing.

GARATU

20 April 2026

Community leaders and farmers met
Land needs confirmed
Farmers ready to begin

TAIDNA

18 April 2026

Community leaders and farmers met
Input needs documented
Community head engaged

SECTION 05

SUPPORT A FARMER.

The cost, how to contribute, and what you gain

What it costs to change a harvest.

INPUT ITEM	NAIRA	USD
NPK 20-10-10 fertilizer (25 kg x 2)	60,000	$43
Certified maize seeds SC651 (2 kg x 2)	16,200	$12
Lagoon herbicide	16,600	$12
Neem Coated Urea (1 bag, 50 kg)	51,400	$37
Labour cash grant	25,000	$18
TOTAL FOR 1 FULL ACRE	**169,200**	**~$121**

At approx. N1,400 per $1. Confirm prices before procurement.

HALF ACRE

~$60

84,600 Naira

Seeds, NPK, herbicide, urea, cash

FULL ACRE -- RECOMMENDED

~$121

169,200 Naira

Complete package | Maximum impact

empowerFarmers has committed 15 farmers.

85 more spots are open. Anyone can fill one.

The goal:
One season.

Same land. Better harvests.

Garatu and Taidna communities have been surveyed. Farmers have confirmed participation. The planting window opens in May 2026.

FUNDING PROGRESS **Target: 100 farmers**

15 farmers committed by empowerFarmers **85 more needed from donors**

15	85	~$60
Committed by empowerFarmers	**Still needed** from anyone	**To support** one farmer

Choose your level of impact.

STARTER

Half an Acre

~$60 / 84,600 NGN

Seeds, NPK, herbicide, urea and labour cash for one farmer's half acre.

SUPPORT NOW

IMPACT

One Full Acre

~$121 / 169,200 NGN

Complete package -- seeds, two bags NPK, urea, herbicide, cash grant and training.

SUPPORT NOW

MORE

Multiple Farmers

Custom amount

2, 5, 10 or more. Individuals, groups, friends -- anyone who wants to do more.

SUPPORT NOW

empowerlocals.org/support -- Under 3 minutes

Farmer details, monthly reports, and direct communication included.

SECTION 06

WHAT YOU GAIN.

Eight reasons to be part of this harvest.

You are not just a donor.

You are part of the harvest.

01

YOU FEED A FAMILY

The average household we serve has 9 people. Your support means they eat well -- not just survive the season.

02

YOU LIFT A WOMAN FARMER

Many of our farmers are women. Your support gives them independence, yield, and a voice in their household.

03

A CHILD EATS MORE MEALS

Food insecurity drops in every household we support. Children who were hungry go to bed fed after harvest.

04

YOU FUNDED THEIR BEST HARVEST

In 2024, farmers with empowerFarmers got the biggest harvest of their lives. You make that possible.

You are not just a donor.
You are part of the harvest.

05

YOUR FARMER KNOWS YOUR NAME

We share your support with the farmer. Many donors and farmers exchange messages. It is a real human connection.

06

MONTHLY PHOTOS FROM THE FIELD

Every farm visit is photographed. You receive a monthly update showing exactly how your farmer is doing.

07

COMPLETE SEASON DOCUMENTATION

Baseline, monthly reports, full endline survey. You see yield, income, food security -- what changed because of you.

08

MULTIPLY YOUR IMPACT

Sponsor 2, 5 or 10 farmers -- many individuals do. One decision, multiple families, one extraordinary season.

The people behind the harvest.
